

GROTHENDIECK 2015

SCHEDULE

MONDAY 15, June			14h00-15h00		15h15-16h15		16h30-17h30		
					D. Gaijs Tamagawa numbers over function fields	D. Gepner On localization sequences in algebraic K-theory	D.C. Cisinski Mixed motives with integral coefficients		
TUESDAY 16, June	9h45-10h45		11h00-12h00		14h30-15h30		15h45-16h45		
		A. Beilinson Singular support of constructible sheaves	F. Loeser Trace formulas and non-archimedean integrals	LUNCH	P. Cartier Analogies entre les espaces de jets et les vecteurs de Witt	M. Robalo Brane Actions and Gromov-Witten invariants (work in coll. with E. Mann)	C. Simpson Nonabelian cohomology		
WEDNESDAY 17, June	8h30-9h30	9h45-10h45		11h00-12h00		12h15			
	L. Illusie Grothendieck and vanishing cycles	M. Demazure Grothendieck, souvenirs and interpretation	M. Raynaud Representability in Algebraic Geometry		Commemorative afternoon				
THURSDAY 18, June	8h45-9h45	10h00-11h00		11h15-12h15		14h30-15h30		15h45-16h45	
	M. Kontsevich Residues modulo large primes	M. Kapranov Sheafifying triangulated categories: sheaves and Schobers	P. Berthelot Non characteristic finiteness theorems in crystalline cohomology	LUNCH	J.M. Fontaine The mysterious curve	A. Vistoli Fundamental gerbes	G. Maltsiniotis Grothendieck's manuscripts in Lasserre		
FRIDAY 19, June	8h45-9h45	10h00-11h00		11h15-12h15					
	A. Goncharov Quantum Hodge field theory	B. Bhatt Classifying lattices in a vector space over a p-adic field	F. Pop Absolute Galois groups as automorphism groups of functors
